COMPANY OVERVIEW

Defianx is a cybersecurity and technology services company supporting federal agencies, prime contractors, mission owners, and regulated organizations. We help customers protect critical systems, strengthen security operations, modernize technology environments, and improve mission readiness.

FEDERAL MISSION SUPPORT

Defianx supports prime and subcontractor delivery models across cybersecurity operations, cloud security, infrastructure modernization, documentation, control evidence, reporting, transition support, and technical execution.

RELEVANT EXPERIENCE AREAS

- Federal civilian security operations · defense & mission IT support
- Critical infrastructure & regulated environments
- SOC monitoring & escalation · incident coordination
- Compliance & audit readiness · cloud & identity protection

TEAMING SUPPORT

Defianx supports primes and mission partners with subcontractor support, surge staffing, cyber labor, proposal response support, transition activities, documentation, SOC operations, cloud security, and compliance execution.

MISSION DELIVERY MODEL

01 Signal Intake Collect the right operational signals.	02 Risk Correlation Prioritize what needs action.	03 Mission Action Move teams from finding to response.	04 Outcome Reporting Reporting leaders can act on.
